## VCE SPECIALTY GAS EQUIPMENT

F-01

### DESCRIPTION:

HPMAN-5GAS

VCE Specialty gas control panels are designed to fill ultra-high purity or research-grade gases up to 99.9999% (grade 6.0) purity.

### FEATURES:

- Gas selector swing arm
- High vacuum meter (0-1000 micron)
- Minor component metering valve
- High accuracy test gauges
- Controlled flow master control valves

## VCE SPECIALTY GAS EQUIPMENT

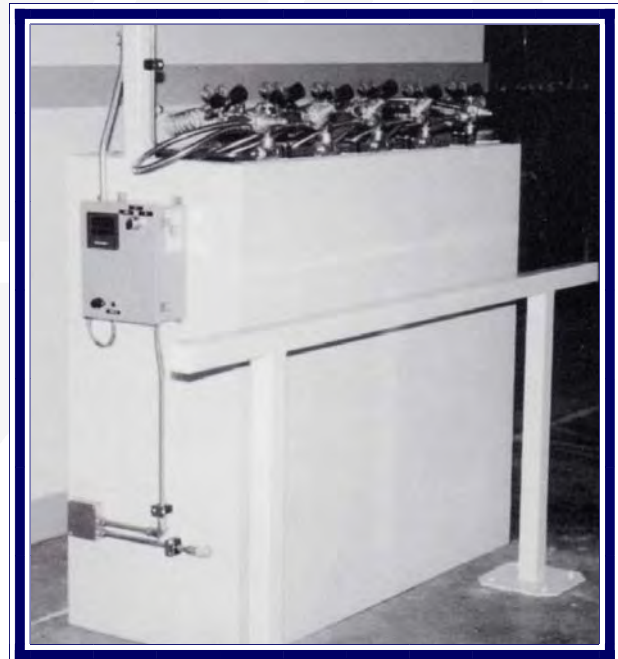

F-03

### DESCRIPTION:

In order to meet stringent high purity gas applications proper cylinder preparation is needed to remove moisture and residual gases. The VCE vacuum bake-out oven will ensure cylinders are prepared properly to achieve ultra-high purity levels to grade 6.0 every time, all the time.

### FEATURES:

- Custom designed to bake up to 12 cylinders at a time
- High accuracy test gauge panel
- High vacuum meter (0-1000 micron range)
- Compound high vacuum pump complete with oil trap-riser assembly to eliminate oil back feed contamination.
- Automatic timer and temperature thermostat control
